## Professional Summary

CompTIA A+ certified IT professional currently pursuing a B.S. in Cybersecurity & Information Assurance at Western Governors University. Hands-on experience troubleshooting hardware, software, Windows systems, networking equipment, and customer connectivity issues through both professional field work and self-built enterprise labs. Experienced supporting end users, documenting technical issues, configuring network devices, and maintaining automated systems in fast-paced environments. Seeking an IT Support, Help Desk, Desktop Support, Data Center, or NOC position while continuing toward CompTIA Network+ and Security+ certifications.

## Core Technical Skills

| Category                  | Skills                                                                                              |
|---------------------------|-----------------------------------------------------------------------------------------------------|
| Operating Systems         | Windows 10/11, Windows Server 2022                                                                  |
| Networking                | TCP/IP, IPv4, DNS, DHCP, Wi-Fi, Router Configuration, Network Troubleshooting                       |
| Windows Administration    | Active Directory (AD DS), DNS, Group Policy, User & Computer Management, PowerShell, Command Prompt |
| Hardware & Support        | PC Hardware, Laptop/Desktop Repair, Printer Support, Imaging & Deployment, Preventive Maintenance   |
| Virtualization & Security | VirtualBox, Wireshark, Nmap, Windows Security, Microsoft 365                                        |
| Professional              | Technical Troubleshooting, End-User Support, Documentation, Customer Service, Problem Solving       |

## Technical Projects

### Active Directory Homelab

- Built a Windows Server 2022 Active Directory environment using VirtualBox.
- Configured AD DS, DNS, users, groups, Organizational Units, and static IP addressing.
- Joined Windows 10 client to the domain and validated authentication.
- Documented deployment and troubleshooting on GitHub.

### Network Analysis

- Captured and analyzed network traffic using Wireshark.
- Performed host discovery and port scanning with Nmap to strengthen networking and troubleshooting skills.

## Professional Experience

### Cable Installer / Field Technician — Spectrum | Apr 2025 – Oct 2025

- Installed and supported internet, television, and voice services for residential customers.
- Configured routers, modems, Wi-Fi networks, and customer devices.
- Diagnosed TCP/IP, DNS, DHCP, wireless, and connectivity issues.
- Educated customers and documented service calls with accurate technical notes.

### Mechatronics Technician — Cushman & Wakefield | Jul 2023 – Jan 2024

- Performed preventive maintenance and troubleshooting on robotics and conveyor systems.
- Responded to equipment failures to minimize production downtime.
- Worked safely with automated equipment and electrical/mechanical systems.

### CNC Machinist — DRT Aerospace | Oct 2025 – Apr 2026

- Maintained quality standards through precision inspections and documentation.
- Assisted with troubleshooting manufacturing equipment and production issues.

### Emergency Medical Technician — Superior Air & Ground Ambulance | Jan 2025 – Apr 2025

- Delivered patient care in high-pressure environments requiring critical thinking, communication, and documentation.

## Education

### Western Governors University

Bachelor of Science – Cybersecurity & Information Assurance (In Progress)

**Relevant Coursework:** Networking, Windows Administration, Linux, Cybersecurity, IT Foundations, IT Applications

### Clark State College

Computer Programming Studies

## Certifications

- CompTIA A+ Certification
- CompTIA Network+ (In Progress)
- Google Cybersecurity Professional Certificate
