PROFESSIONAL SUMMARY

Hands-on IT and Infrastructure Technician with experience in network installation, hardware troubleshooting, connectivity diagnostics, and technical support. Skilled in TCP/IP, DNS, DHCP, structured cabling, router configuration, and system troubleshooting through professional field service experience and personal lab environments. Currently pursuing a Bachelor of Science in Cybersecurity and Information Assurance at Western Governors University and actively studying for CompTIA A+, Network+, and Security+. Proven ability to work under pressure, follow strict procedures, document incidents accurately, and quickly resolve technical issues in fast-paced environments.

TECHNICAL SKILLS

Security Tools: Wireshark, tcpdump, Suricata, Splunk, Nmap

Operating Systems: Linux, Windows

Networking: TCP/IP, DNS, DHCP, VPN, Network Infrastructure, DOCSIS, Ethernet, Coaxial Cabling, Router Configuration, Wi-Fi Troubleshooting, Cabling/Fiber

Infrastructure: Hardware Troubleshooting, Server Maintenance, Rack and Stack, Break/Fix Support, Data Center Operations, Preventive Maintenance, Incident Documentation, Ticketing Systems

Programming / Databases: Python, SQL

PROFESSIONAL EXPERIENCE

Field Service Technician / Network Installation Technician | Spectrum | Mar 2025 – Present

- Install, configure, and troubleshoot internet, phone, and television services using coaxial, Ethernet, and network infrastructure.
- Diagnose and resolve connectivity issues involving TCP/IP, DNS, DHCP, routers, modems, and Wi-Fi networks.
- Use diagnostic tools to measure signal strength, identify outages, and restore service quickly.
- Perform physical cabling, line testing, and equipment replacement in residential and business environments.

- Document service calls, troubleshooting steps, and resolutions accurately.
- Educate customers on network optimization and equipment usage.

Emergency Medical Technician | American Medical Response | Jul 2021 – Mar 2025

- Responded rapidly to emergency incidents requiring critical thinking and prioritization under pressure.
- Maintained accurate electronic documentation while complying with standards.
- Communicated effectively with hospitals, dispatch, and team members during high-stress situations.

EDUCATION

Bachelor of Science, Cybersecurity and Information Assurance
Western Governors University | Mar 2026 – Present
